- Removal crews: displaying on the map in real time, calculation of the distance traveled, payroll calculation
- Mobile app REST API for removal crews

Freelance Web Developer

October 2013 – 2015

I started out by opening a web agency, where I did everything: marketing, sales, customer support, design and of course software development. I made websites, online stores, landing pages and much more. I realized that I was specifically interested in development, and was employed under contract by a series of my larger customers as a fullstack developer.
